Objective

Early-career IT professional with hands-on experience in customer support, onboarding, troubleshooting, and digital systems. I bring strong communication, problem-solving, and deep listening skills developed through frontline work at CityFitness and technical support exposure during my Datacom internship. Motivated by learning, collaboration, and delivering clear, confident support that helps people use technology effectively. Seeking an opportunity to grow my technical capability while contributing to a team through reliable, user-focused service.

Technical Skills

- User onboarding, guidance, and empathetic support
- Basic front-end development and UI/UX awareness
- Experience with digital systems, troubleshooting, and access workflows
- Familiarity with wearable technology concepts and biofeedback loops
- Research assistance: documentation, observation, and data organisation
- AI-assisted workflows: Cursor, GitHub Copilot, Perplexity

Soft Skills

- Empathy, emotional awareness, and user-centred thinking
- Curiosity-driven learning and adaptability
- Clear communication and deep listening
- Resilience, initiative, and willingness to take on challenges
- Attention to detail, pattern recognition, and thoughtful observation
- Collaborative mindset and respect for diverse perspectives

Work Experience

- **Datacom — ANZ Application Services Team** Apr 2026 – Jun 2026
IT Intern Auckland
 - Supported onboarding workflows, troubleshooting, access requests, and application-related queries for internal teams
 - Guided users through new systems, account setup, permissions, and MFA processes
 - Maintained clear communication loops with stakeholders to ensure smooth onboarding outcomes
 - Shadowed senior analysts and contributed to real support workflows in a fast-paced environment
 - Strengthened critical thinking, technical confidence, and customer-focused problem solving
 - Built an AI-driven newsletter that read industry RSS feeds and generated targeted updates for Datacom employees
- **PawMatch.fit** Sep 2025 – Present
Independent Developer (Personal Project)
 - Designed and built user-facing features with a strong focus on usability and customer experience
 - Conducted user testing and implemented UI/UX improvements based on feedback
 - Managed full development lifecycle: planning, wireframing, coding, testing, deployment, analytics
 - Demonstrated initiative, ownership, and customer-centric design thinking

- **CityFitness**
Receptionist / Customer Support
 - Delivered professional front-line support, resolving inquiries and guiding customers through processes
 - Managed end-to-end onboarding for new members, including accounts, payments, and system navigation
 - Maintained accurate records, workflows, and communication across multiple digital systems
 - Built strong customer relationships through empathy, listening, and proactive support

Feb 2025 – Present

Auckland
- **Various Auckland Venues**
Chef & Kitchen Team Leader
 - Led kitchen teams, coordinated operations, and upheld safety standards
 - Developed leadership, time management, and problem-solving skills in high-pressure environments

2009 – 2018

Auckland

Education

- **Open Polytechnic of New Zealand**
